Safety and Productivity Go Hand-in-Glove

Innovative, comfort-engineered safety products that workers want to wear.

Most businesses depend on skilled and experienced hands to get the job done, yet hand protection is not always given the priority it deserves. You can change that by choosing gloves from Honeywell.

Hand lacerations, abrasions, and chemical exposure are some of the most common injuries in many work environments. To help combat these issues, Honeywell offers the most comprehensive selection of quality work gloves on the market today, so jobs can be done safely and effectively.

Supplied exclusively in southern Africa by HSE Solutions, Honeywell provides industrial gloves that go beyond protection to include elements that enhance grip, dexterity, and tactile sensitivity, helping workers get the job done and, most importantly, stay safe.

Your workforce is only as safe as it needs to be when Personal Protective Equipment (PPE) is worn correctly and consistently. Ensure compliance and protection in every situation - offer them real safety designed for real people.

Welcome to A-OSH EXPO 2016

Dear Visitor, Exhibitor and Partners

Last year's event saw a phenomenal growth in the number of visitors to A-OSH EXPO, underlining the exhibition's ability to provide the market with a unique opportunity to interact with exhibitors, preview on-stand demonstrations and increase their knowledge base at the free-to-attend events and conferences.

With over 90 exhibitors waiting to interact with visitors, there's a solution for every occupational safety and health (OSH) risk. From risk assessment consultants and training providers, through to suppliers of personal protective equipment, gas detection and monitoring equipment, environmental control equipment and services, breathalysers and working-at-height safety equipment, the range is large and varied.

In addition to a large number of long-standing exhibitors, we are also pleased to welcome 24 new exhibitors to the show.

Visitor attractions

Besides a wide array of OSH solutions, we have also lined up a superb educational programme where delegates can learn about best practice, the current OSH trends and updated legislative matters in the seminar sessions held over the three-day period of the exhibition:

- The free-to-attend NOSHEBO Seminar Theatre sponsored by Ansell (in Hall 3). You can find the programme on page 5.
- The free-to-attend PASMA Working at Height Theatre (in Hall 3). You can find the programme on page 4.
- The Saiosh Conference, which focuses on building a professional future for health and safety within your organisation. It will address

current issues relating to employee health, safety and well-being.

- Another visitor attraction is the business matchmaking service, sponsored by Ideco, which allows pre-registered visitors and exhibitors to set up meetings prior to the event.
- The INfReS seminar, hosted by FPASA, caters for insurance technical staff. It will provide feedback on projects in which FPASA is involved. The seminar is scheduled to take place in Gallagher 3, on May 25.

Please visit the website at www.aosh.co.za for more information on any of the feature areas and for updated conference and seminar programmes.

Thank you to all our sponsors, media partners and associations for their ongoing support and commitment to A-OSH EXPO.

Joshua Low
Event Director, Specialised Exhibitions

The A-OSH EXPO Event Guide is published by Charmont Media Global (the publisher of *SHEQ MANAGEMENT*: www.sheqmanagement.com). Whilst every effort has been made to ensure accuracy in the compilation of this publication, neither the publisher nor the organiser can accept any liability for any errors and omissions.

HSE Training and Consultancy

General Safety Courses:

- Work at Height Safety and Awareness
- Various ISO & OHSAS Management Courses
- Risk Assessment, Contractor Management
- Accident Reporting, Recording & Investigation
- Health and Safety Policy Writing
- Asbestos Awareness Training
- Manual Handling
- Fire Safety Training

NEBOSH Courses:

- International General Certificate.
- International Construction Certificate.
- International Fire Safety Certificate.
- Award in Health and Safety at Work
- Above course can also be done via e-learning
- E-Learning for NEBOSH International Diploma.
- E-Learning for NEBOSH Environmental Diploma

SPECIALISED EXHIBITIONS
MONTGOMERY

Centre for Business Management

PROGRAMME IN SAFETY MANAGEMENT (72435)

This course focuses on the science of Safety Management and the safety responsibilities of both line managers and staff safety practitioners. This programme introduces line managers and safety practitioners to the very basics in safety management. Such basics comprise the sciences of safety management and the roles of line and staff functionaries pertaining to safety risk assessment, safety management in industry and the analysis of safety incidents.

The focus and contents of the programme is unique in the sense that it prepares both managers and safety practitioners for performing their roles and functions on a professional and scientific basis. The programme focuses on meeting the needs of line managers and staff safety practitioners in achieving their legal responsibilities and professional accountability in making the workplace and the work procedures as safe as possible for all involved.

MODULES:

- Introduction to Safety Management (PSMP015)
- Assess Safety Risk (PSMP026)
- Manage Safety in the Workplace (PSMP038)
- Analyse Safety Incidents (PSMP049)

REGISTRATION DATES

December - February

FEE:

R6 600

COURSE DURATION:

12 Months
NQF level 6, Total 48 credits

ADMISSION REQUIREMENTS:

A Senior Certificate, equivalent qualification or appropriate experience.

CONTACT PERSON:

Mr NJF van Loggerenberg
Email: psmp@unisa.ac.za
Tel: 012 352 4378

PROGRAMME IN ADVANCED SAFETY MANAGEMENT (76914)

This course focuses on a broader view of Safety Management and the safety responsibilities of both line managers and staff safety practitioners. This programme investigates the advanced elements of safety management. These elements include the management of safety culture, the role and importance of safety supervisors, system safety engineering and the system safety programme plan; the importance of managers in safety and a more advanced understanding of hazards.

MODULES:

- Managing Safety Culture (APSM01N)
- Safety Supervisor (APSM02M)
- Safety Systems (APSM03O)
- Design for Safety (APSM04P)

REGISTRATION DATES

December - February

FEE:

R7 500

COURSE DURATION:

12 Months
NQF level 7, Total 48 credits

ADMISSION REQUIREMENTS:

A Senior Certificate, equivalent qualification or appropriate experience and completed Programme in Safety Management (PSMP) with the Centre for Business Management.

HyFlex®

HYFLEX® 11-541: EXCEPTIONAL CUT PROTECTION IN AN ULTRALIGHT WEIGHT GLOVE.

The HyFlex 11-541 is engineered to provide comfort with its thin, snug liner; protection against cuts with new Intercept Cut Resistance Technology®; added abrasion resistance for durability, and grip for reduced hand fatigue, ensuring workers are protected and comfortable throughout their work day.

INTERCEPT Technology® blends engineered synthetic and natural fibers into high-performance yarns that provide high cut protection along with great comfort and dexterity.
